

Taking care of your cloud so you can focus on your business.

What can we help you with?

01 DevOps & Support

Stormit is an AWS Advanced Tier Services Partner and AWS Well-Architected Partner.

02 Container Orchestration

From Amazon EKS (Elastic Kubernetes Service) to AWS native Amazon ECS (Elastic Container Service), full lifecycle management of clusters, including provisioning, scaling, and upgrades.

03 Serverless Applications

Design, deployment, and monitoring of event-driven, serverless applications that scale automatically.

04 Infrastructure Automation & CI/CD Pipelines

Automated backups, patching, scaling, and infrastructure as code (IaC) for reliability. CI/CD Pipelines to automate builds, tests, and deployments for faster development cycles.

- AWS WAF Delivery
- AWS Lambda Delivery
- Amazon CloudFront Delivery
- Well-Architected Partner Program

Smart pick for emerging enterprises

GREAT CHOICE FOR:

- Scaling startups that are looking for a reliable partner to support rapid growth.
- SMEs wanting cost-effective, worry-free AWS operations.
- Enterprises in need of advanced security, governance, and architecture guidance.

CLOUD COST OPTIMIZATION

Rightsizing resources, reserved instance planning, and FinOps best practices to lower your AWS bill.

SECURITY & COMPLIANCE

Ongoing threat detection, vulnerability management, and alignment with AWS security best practices.

INFRASTRUCTURE MANAGEMENT

Automated backups, patching, scaling, and infrastructure as code (IaC) for reliability and agility.

Why choose Stormit?

- 01** Expert cloud management custom-crafted to your business needs whether you're starting your cloud journey or optimizing existing infrastructure.
- 02** Specialized in building and managing scalable, secure, and high-performing cloud infrastructures using AWS-native technologies.
- 03** Security-first approach with personalized, responsive support.
- 04** International experience with clients in over 20 countries.
